

INVITATION

We will show you the “EKATO way” to scale-up from lab to production size – Quick, reliable and cost efficient!

Agitated processes from lab to production

on October 21, 2021

from 3.00 – 4.30 pm (CEST)

- Scale-Up of an agitated reactor - theory and principles
- Experimental based approach (lab & pilot trials)
- Model based approach (CFD simulations)
- Examples from process industry

Target group

Chemists, process engineers, project managers as well as anybody interested in process development, equipment engineering, production and scale-up.

Objectives

For some examples from all over process industry we will demonstrate efficient scale-up tools,
- experimental based, lab and pilot testing, how to select the right scale
- plus computer-based, CFD or FEA modeling and how to validate the results

Price & Registration

The webinar is free of charge. Please register here:
