

INVITATION

Construction and installation of a plant is a complex process. Challenges and solutions are going to be discussed during this webinar.

Pilot Plants – the Bridge to Production

on December 16, 2021
from 3.00 – 4.30 pm (CET)

- **Pilot plants – what is the benefit?**
- **Scale-up from lab to production – what size of pilot plant?**
- **Process validation – demonstrating the stability of your process**
- **Modular pilot plants**

Target Group

All responsible people dealing with agitators. General managers, plant managers; process engineers, buyers, project managers as well as anyone interested in improving the reliability of a plant.

Objectives

Pilot plants including agitated reactors often represent a milestone in commercial development of new products and processes to increased scale. A pilot plant is essential to demonstrate chemical and physical stability of your process and helps in exploring further process and engineering issues to further optimize your technology before entering into full-scale operation.

Price & Registration

The webinar is free of charge. Please register here:
