

Online Hydrogenation Days

Webinar

**October 13-14,
2022**

**2.30 pm – 5.00 pm
(CEST)**

**Free of
charge**

When it comes to hydrogenation plants, 89 years of experience and more than 500 active references make EKATO a competent partner. As a turnkey supplier, EKATO assumes overall responsibility from the idea to the commissioning of an industrial hydrogenation plant.

Attendees of this 2-days web-seminar will learn how to successfully design, scale-up and implement a hydrogenation process in industrial-sized reactors. Typical hydrogenation plant concepts and latest trends in hydrogenation technology will be presented. During the webinar a chat session will allow you to exchange and discuss directly with the speakers. We are looking forward to meeting you !

Objectives

In this webinar we will show current trends and developments in industrial hydrogenation technology. We will also give an insight in how to optimize existing hydrogenation processes.

Target Group

Process engineers, project managers as well as persons responsible for process development, production, and hydrogenation processes.

Agenda

October 13, 2022

02.30 pm – 03.30 pm	Fundamentals of Industrial Hydrogenation Technology
03.30 pm - 03.40 pm	Break
03.40 pm – 04.30 pm	Case Study with EVONIK: How to realize the full potential of your heterogeneous catalytic hydrogenation (Evonik Operations GmbH)
04.30 pm – 05.00 pm	Q&A

October 14, 2022

02.30 pm – 03.15 pm	Concepts for Catalyst Filtration & Recovery
03.15 pm – 03.20 pm	Break
03.20 pm – 04.10 pm	Hydrogenation Reactor & Process Plant Design Strategies
04.10 pm – 04.40 pm	Process Safety & Loss Prevention in Hydrogenation Plants
04.40 pm – 05.00 pm	Q&A
