

## Hydrogenation Plants for Pharmaceutical API Production

Are you ready to dive into the technical world of API hydrogenation?

Discover the essentials of agitated hydrogenation processes, explore innovative design concepts for agitated hydrogenation reactors, and learn about cutting-edge modular hydrogenation plant technology - all centred around API production.

(API = Active Pharmaceutical Ingredients)

Webinar

October 23, 2025

4.00 – 4.30 PM (CEST)

Free of charge

### What You'll Learn:

- **Basics of Hydrogenation:**

Understand the fundamental principles of agitated hydrogenation processes

- **Design Concepts for Hydrogenation Reactors:**

Get insights into design strategies to enhance performance, flexibility and cleanability

- **Modular Hydrogenation Plant Technology:**

Explore the benefits and advancements in modular systems in API production.

### Objectives

For professionals involved in designing and operating chemical process plants for Active Pharmaceutical Ingredients (API), this session will provide valuable insights into optimizing hydrogenation processes, enhancing efficiency, and ensuring high-quality production standards.
