

Scale-up – Agitated Processes from Lab to Production

We will show you the “EKATO way” to scale-up from lab to production size - Quick, reliable and cost efficient, and based on more than 90 years of experience!

Webinar

**November 20,
2025**

**9.00 – 9.30 am
(CET)**

**Free of
charge**

Let's get practical and talk about how to “grow up” an agitated process:

- **Scale-up of an agitated reactor - theory and principles**
- **Experimental based approach (lab & pilot trials)**
- **Model based approach (CFD simulations)**
- **Examples from process industry**

EKATO consults and accompanies its customers throughout their entire customer journey. Starting with the initial idea, through possible trials and subsequent scale-up into the industrial mixing process, to the actual mixing system - or even to the turnkey process plant.

In this webinar we want to show how agitated processes can be scaled up with focus on reliability, efficiency and time to market – it is all about using the right tools and strategies for the corresponding agitated vessels or unit operations.
